Damon
Damon Simplifies Logistics

Introduction

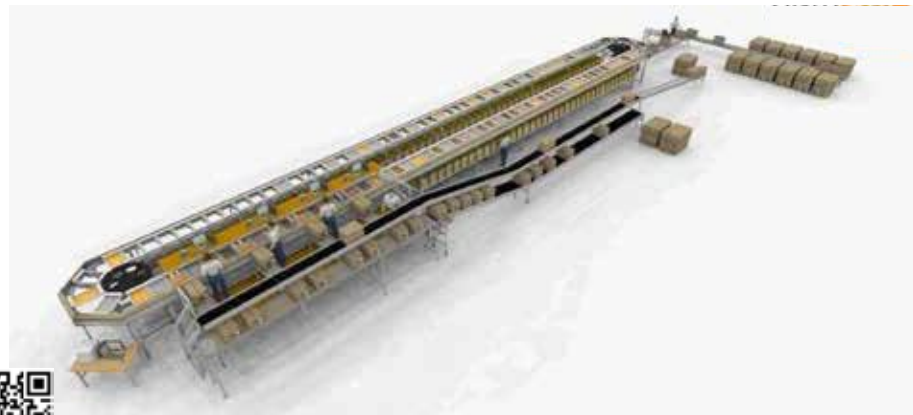

Eurosort flat tray sorters meet the requirements for high volume, single item sorting in many different industries. Goods to be sorted are delivered to the sorter by conveying equipment and either loaded automatically or manually by an operator. Connected to the WCS (warehouse control system) and controlled by software, the sorter automatically sorts the goods to free fall or exit chutes into shipping cartons or totes. Through continuous innovation, the Eurosort flat sorter can achieve rates of 5,000 ~ 28,000p/h. Components are designed for an optimized, easy to operate system which is cost effective with simple installation and easy maintenance.

Damon & Eurosort

Eurosort was founded in 2001 and are located in Weesp, (near Amsterdam) in the Netherlands. They employ experienced technicians who are focused on research and development and innovation on single-item sorting equipment for the materials handling industry.

Damon was established in 1997 and is one of the leading suppliers of intelligent logistic systems and equipment in China. Our intelligent logistic systems have a high market share in the E-Commerce, postal, apparel and pharmaceutical industries as well as factory automation. Damon is ranked as the leader in the industry and it is the exclusive distributor of Eurosort sorters in China.
